

Membership of the Cardiovascular disease escalation of therapy for secondary prevention update Guideline Committee

The Committee will operate as an advisory Committee to NICE's Board, developing Cardiovascular Disease Prevention guidelines.

The terms of reference and standing orders for the Committee can be found in [appendix D of Developing NICE guidelines: the manual](#).

The Committee will have 14 members. In addition, there will be 4 co-opted members.

Dr Mark Glover was a member of the committee for the March 2022 update of the Hypertension guideline (NG136), the May 2023 update of the CVD prevention risk tools, dietary cholesterol and statins (CG181) and the escalation of therapy for secondary prevention update of CG181 until his very sad and untimely death in February 2023. The Chair and other members of the committee pay tribute to Mark's work on the CVD suite of guideline updates and remember him as a valued colleague and friend.
