## 1. Welcome and objectives for the meeting

The Chair welcomed the guideline development group (GDG) members and attendees to the 10<sup>th</sup> meeting on non-complex fractures. The GDG members and attendees introduced themselves.

The Chair informed the Committee that apologies had been received. These are noted above.

The Chair outlined the objectives of the meeting, which included:

- Presentation of the updated scaphoid health economic model
- Presentation and discussion of evidence for the following topics:
  - paediatric femoral fracture
  - Safe delay in surgical management of distal radius fractures
  - Documentation
  - Pharmacological management of pain
  - Treatment of fractured humerus

## 2. Declarations of interest

The Chair confirmed that, for the purpose of managing conflicts of interest, the matters under discussion were:

- Scaphoid health economic modelling
- Paediatric femoral fracture
- Safe delay in surgical management of distal radius fractures
- Documentation
- Pharmacological management of pain
- Treatment of fractured humerus

The Chair asked everyone to verbally declare any conflicts of interest that have arisen since the last meeting. No new interests were declared. Previously declared interests were reviewed prior to the meeting and there were no conflicts of interest with matters under discussion.

### **3. Minutes of last meeting**

The Chair asked the Committee if it wanted any changes made to the minutes of the last meeting. The Committee agreed that the minutes were a true and accurate account of the meeting.

The Chair confirmed that all matters arising had been completed or were in hand.

### **4. Presentations**

4.1 The Chair introduced Peter Cain, Health Economist, who gave a presentation on the scaphoid model. The GDG then discussed the issues presented in relation to this guideline. The Chair thanked Peter Cain for their presentation.

4.2 The Chair introduced Mark Perry, Senior Research Fellow and Peter Cain, who gave presentations on the clinical and cost effectiveness evidence for paediatric femoral fracture. The GDG then discussed the evidence and draft recommendations. The Chair thanked Peter Cain and Mark Perry for their presentations.

4.3 Mark Perry, Senior Research Fellow and Peter Cain, gave presentations on the clinical and cost effectiveness evidence for safe delay in surgical management of distal radius fractures. The GDG then discussed the evidence. The Chair thanked Peter Cain and Mark Perry for their presentations. This topic will be revisited at GDG11.

4.4 Mark Perry and Peter Cain gave presentations on the clinical and cost effectiveness evidence for documentation. The GDG then discussed the evidence and draft recommendations. The Chair thanked Peter Cain and Mark Perry for their presentations.

4.5 Frank O' Neill, Research Fellow and Peter Cain gave presentations on the clinical and cost effectiveness evidence for pharmacological management of pain. The GDG then discussed the evidence and draft recommendations. The Chair thanked Peter Cain and Frank O'Neill for their presentations.

4.6 Frank O'Neill and Peter Cain gave presentations on the clinical and cost effectiveness evidence for definitive treatment of humerus fracture (displaced low energy fracture of the proximal humerus). The GDG then discussed the evidence and draft recommendations. The Chair thanked Frank O'Neill and Peter Cain for their presentations.
