NICE guidelines

Equality impact assessment

Spinal injury assessment

The impact on equality has been assessed during guidance development according to the principles of the NICE equality policy.

1.0 Scope: before consultation

1.1 Have any potential equality issues been identified during the development of the draft scope, before consultation, and, if so, what are they?

No issues were identified. The scope considers all adults, young people and children who present with suspected spinal injury in primary, secondary or tertiary settings irrespective of gender, ethnicity, disability, religion or beliefs, sexual orientation and gender identity or socio-economic status.

1.2 What is the preliminary view on the extent to which these potential equality issues need addressing by the Committee? For example, if population groups, treatments or settings are excluded from the scope, are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?

N/A

2.0 Scope: after consultation

2.1 Have any potential equality issues been identified during consultation, and, if so, what are they?

No issues were identified. The scope considers all adults, young people and children who present with suspected spinal injury in primary, secondary or tertiary settings irrespective of gender, ethnicity, disability, religion or beliefs, sexual orientation and gender identity or socio-economic status.

2.2 Have any changes to the scope been made as a result of consultation to highlight potential equality issues?

None were made

2.3 Is the primary focus of the guideline a population with a specific disability-related communication need?

If so, is an alternative version of the 'Information for the Public' document recommended?

If so, which alternative version is recommended?

The alternative versions available are:

- large font or audio versions for a population with sight loss;
- British Sign Language videos for a population who are deaf from birth;
- 'Easy read' versions for people with learning disabilities or cognitive impairment.

N/A

3.0 Guideline development: before consultation

3.1 Have the potential equality issues identified during the scoping process been addressed by the Committee, and, if so, how?

No issues were identified. The scope considers all adults, young people and children who present with suspected spinal injury in primary, secondary or tertiary settings irrespective of gender, ethnicity, disability, religion or beliefs, sexual orientation and gender identity or socio-economic status.

3.2 Have any **other** potential equality issues (in addition to those identified during the scoping process) been identified, and, if so, how has the Committee addressed them?

No issues were identified.

3.3 Were the Committee's considerations of equality issues described in the consultation document, and, if so, where?

When considering any evidence the GDG discusses any potential equality issues. If any are identified this is recorded in Recommendations to evidence section. No issues were identified.

3.4 Do the preliminary recommendations make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

No

3.5 Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

No

3.6 Are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access to services identified in questions 3.1, 3.2 or 3.3, or otherwise fulfil NICE's obligation to advance equality?

N/A

4.0 Final guideline

4.1 Have any additional potential equality issues been raised during the consultation, and, if so, how has the Committee addressed them?

4.2 If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

4.3 If the recommendations have changed after consultation, is there potential for the recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

4.4 If the recommendations have changed after consultation, are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access to services identified in questions 4.2, 4.3 and 4.4, or otherwise fulfil NICE's obligations to advance equality?

4.5 Have the Committee's considerations of equality issues been described in the final guideline document, and, if so, where?
