Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Haematological cancers: improving outcomes (update)

2 List of Modelling Questions

Clinical questions by scope area	**Should centralised, integrated diagnostic reporting via Specialist Integrated Haematological Malignancy Diagnostic Services [SIHMDS] be the standard of care for diagnosing haematological cancers in all age groups?**
	What is the most effective way of providing an integrated diagnostic service (for example, co-located laboratory facilities that solely provide haematological cancer diagnosis or networked geographically separate facilities that may also provide other services)?
Population	Adults and young people (16 years and older) presenting with suspected haematological malignancies
Interventions considered for inclusion	**Intervention:** • Co-located SIHMDS • Networked SIHMDS **Comparator:** • Local Reporting
Type of analysis	CUA
