

APPENDIX H: SEARCH STRATEGIES FOR THE IDENTIFICATION OF CLINICAL STUDIES

Scoping searches

A broad preliminary search of the literature was undertaken in September 2014 to obtain an overview of the issues likely to be covered by the scope, and to help define key areas. Searches were restricted to clinical guidelines, Health Technology Assessment (HTA) reports, key systematic reviews and RCTs.

- BMJ Clinical Evidence
- Canadian Medical Association (CMA) Infobase (Canadian guidelines)
- Clinical Policy and Practice Program of the New South Wales Department of Health (Australia)
- Clinical Practice Guidelines (Australian Guidelines)
- Cochrane Central Register of Controlled Trials (CENTRAL)
- Cochrane Database of Abstracts of Reviews of Effects (DARE)
- Cochrane Database of Systematic Reviews (CDSR)
- Excerpta Medica Database (Embase)
- Guidelines International Network (G-I-N)
- Health Evidence Bulletin Wales
- Health Management Information Consortium [HMIC]
- HTA database (technology assessments)
- Medical Literature Analysis and Retrieval System Online (MEDLINE/MEDLINE In-Process)
- National Health and Medical Research Council (NHMRC)
- National Library for Health (NLH) Guidelines Finder
- New Zealand Guidelines Group
- NHS Centre for Reviews and Dissemination (CRD)
- Organizing Medical Networked Information (OMNI) Medical Search
- Scottish Intercollegiate Guidelines Network (SIGN)
- Turning Research Into Practice (TRIP)
- United States Agency for Healthcare Research and Quality (AHRQ)
- Websites of NICE – including NHS Evidence - and the National Institute for Health Research (NIHR) HTA Programme for guidelines and HTAs in development.

Further information about this process can be found in the NICE Guidelines Manual (NICE, 2015).

Systematic search

Each search was constructed using the groups of terms set out in Text Box 1. The selection of search terms was kept broad to maximise retrieval of evidence in a wide range of areas of interest to the GDG.

Text Box 1: Summary of systematic search strategies: Search strategy construction

Topic: Identification and assessment				
Review question(s)	Search construction	Study design searched	Databases searched	Date range searched
1.1 Incidence and prevalence	Search 1 [((Learning disorder terms) OR (mental disorder terms)) AND (incidence and prevalence named tool terms)]	All studies	Embase, MEDLINE, PreMedline, PsycINFO	Database inception to December 2016
	Search 2 [updates Buckles, J. et al 2013] [((Learning disorder terms) OR (mental disorder terms)) AND (incidence and prevalence terms)]	All studies	Embase, MEDLINE, PreMedline, PsycINFO	2010 to December 2016
	Search 3 [updates Enfield, J. et al 2014] [((Learning disorder terms) OR (mental disorder terms)) AND (incidence and prevalence terms)]	All studies	Embase, MEDLINE, PreMedline, PsycINFO	2010 to December 2016

1.2 Case identification and tools	[[population terms) AND (measurements/tools) AND (identification/assessment) AND (diagnostic accuracy filter)) OR (named tools)]	All studies	Embase, MEDLINE, PreMedline, PsycINFO	Database inception to December 2016
1.3 Assessment	[[population terms) AND (measurements/tools) AND (identification/assessment) AND (diagnostic accuracy filter)) OR (named tools)]	All studies	Embase, MEDLINE, PreMedline, PsycINFO	Database inception to December 2016
Topic: Psychological interventions				
Review question(s)	Search construction	Study design searched	Databases searched	Date range searched
Prevention 2.1, 2.12, Treatment/management 3.1	Search 1 General medical databases: [[population terms) AND (SR/RCT filter terms)] Topic databases: [[population terms)]	SR, RCT	General medical databases: Embase, MEDLINE, PreMedline, PsycINFO Topic databases: CDSR, DARE, CENTRAL, HTA	Database inception to December 2016

Prevention 2.1, 2.12, Treatment/management 3.1	Search 2 [updates Vereenoghe, L and Langdon, P.E. (2013)] General medical databases: [(population terms) AND (psychological intervention terms)]	All studies	General medical databases: Embase, MEDLINE, PreMedline, PsycINFO	2012 to December 2016
Prevention 2.1, 2.2, 2.3, 2.6, 2.7, 2.8, 2.9, 2.10, 2.12 Treatment/management 3.1, 3.2, 3.3, 3.6, 3.7, 3.8, 3.9, 3.10	Search 3 [HS] [(population terms) AND (psychological/psychosocial intervention terms)]	All studies	General medical databases: Embase, MEDLINE, PreMedline, PsycINFO	2012 to December 2016
Topic: Pharmacological interventions

Review question 3.10	In people (children, young people and adults) with learning disabilities and mental health problems, does psychoeducation aimed at treating and managing mental health problems produce benefits that outweigh possible harms when compared to an alternative approach?
Review question 3.11	In people (children, young people and adults) with learning disabilities and mental health problems, do exercise interventions aimed at treating and managing mental health problems produce benefits that outweigh possible harms when compared to an alternative approach?
Topic	Approaches for service access, coordination and communication, and engagement and empowerment
Review question 4.1	In people (children, young people and adults) with learning disabilities and mental health problems, do interventions aimed at improving accessibility of services (e.g., by removing barriers) produce benefits that outweigh possible harms when compared to an alternative approach?
Review question 4.3	What is the best approach with regard to the coordination and communication with key persons and services in the life of the person with learning disabilities and mental health problems?
Review question 4.4	What are the most appropriate strategies to engaging the family and staff/advocate of people with learning disabilities in the design, implementation and monitoring of interventions for that person's mental health problems?
Review question 4.5	What are the most appropriate strategies to engage and empower service users with learning disabilities in the design, implementation and monitoring of interventions for that person's mental health problems?
Topic	Models for transition between services
Review question 4.2	In people (children, young people and adults) with learning disabilities and mental health problems, what are the effective models or support for transition between services (for example, young person to adult, adult to older adult, NHS to social care/residential)?

Topic	Service structures, training and supervision to support practitioners in delivery effective interventions
Review question 4.6	What are the most appropriate service structures, training and supervision to support practitioners in the effective delivery of interventions for people (children, young people and adults) with learning disabilities and mental health problems?
Topic	Interventions, training, support to improve health and wellbeing of family carers and staff
Review question 5.1	In family carers and staff caring for people (children, young people and adults) with learning disabilities and mental health problems, which interventions, training and support improve the health and well-being of the family and staff as well as that of the person with learning disabilities when compared to an alternative approach?
