Eating disorders: recognition and treatment

The considerations and potential impact on equality and health inequalities have been considered throughout the guidance development, maintenance and update process according to the principles of the NICE equality policy and those outlined in [Developing NICE guidelines: the manual](#).

This EHIA relates to:

Treatments for longstanding anorexia nervosa.

Appendix A: equality and health inequalities assessment (EHIA)

2024 exceptional surveillance of eating disorders: recognition and treatment (NICE guideline NG69)

STAGE 1. Surveillance review

Date of surveillance review: May 2024

Focus of surveillance review: treatment of longstanding anorexia nervosa

Exceptional review

1.1 On reviewing the existing EIA or EHIA and issues log for the guideline(s) and quality standard(s), describe below any equality and health inequalities issues relevant to the current surveillance review

No equalities issues specific to this topic were identified from previous equality impact assessments.

1.2 Did you identify any equality and health inequalities issues through initial intelligence gathering (for example, national policy documents, topic expert/patient group feedback, evidence searches, implementation data)?

No equalities issues specific to this topic were identified from initial intelligence gathering.

1.3 If you have consulted stakeholders or topic experts, what questions did you ask about equality and health inequalities issues?

Stakeholders and topic experts were not contacted for this topic.

1.4 What equality and health inequalities issues have been identified during this surveillance review and what was the impact on the current review and outcome decision? [If an update is proposed, include information in the update and outcomes plan]

No equalities issues specific to this topic were identified during this surveillance review process.
