an accurate record of the discussions.

LS provided an update on progress with Duodopa and NHS England in terms of their commissioning policy.

#### **2. RQ11 - Effectiveness of pharmacological interventions for the treatment of orthostatic hypotension in PD**

SW presented the evidence found relating to this review question. The results were presented in relation to the following outcomes – adverse events and mortality; falls, non-motor features; blood pressure; autonomic dysfunction. No evidence was found in relation to health related quality of life and carer burden. The Committee debated the quality of the evidence and considered their experiences of the effectiveness of pharmacological interventions. The group went on to make recommendations.

#### **3. RQ12 – Effectiveness of pharmacological interventions to treat thermoregulatory dysfunction in PD**

SW informed the committee that no evidence had been found for this review question. The committee felt unable to make any significant new recommendations for this question.

#### **4. Review Protocols**

SW and GR presented the draft review protocol for

**RQ20** – What is the comparative effectiveness of donepezil, galantamine, memantine and rivastigmine for cognitive enhancement in dementia associated with PD? The committee discussed and agreed the range of interventions for inclusion within the protocol.

#### **Additional Agenda Item – Health Economics**

Due to the previous agenda items progressing well an additional agenda item was included which discussed further the development of the proposed health economic model.

#### **5. Linking evidence to recommendations (LETR) tables**

The Committee reviewed the draft summary of their earlier discussions about how the draft recommendations were formulated (LETR tables).

These were agreed as an accurate record. It was confirmed the tables would be written up in full prose and sent out to the committee in the week following the meeting.
