

Endometriosis: diagnosis and management

Appendices A, B & C

Clinical guideline

Scope, Stakeholders and DOIs

September 2017

Final

*Developed by the National Guideline Alliance, hosted
by the Royal College of Obstetricians and
Gynaecologists*

Disclaimer

Healthcare professionals are expected to take NICE clinical guidelines fully into account when exercising their clinical judgement. However, the guidance does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of each patient, in consultation with the patient and/or their guardian or carer.

Appendices

Appendix A: Scope

A.1 Guideline title:

Endometriosis: diagnosis and management

A.2 Topic

The Department of Health in England has asked NICE to develop a guideline on the diagnosis and management of endometriosis.

A.3 Who the guideline is for

- healthcare professionals in primary and secondary care
- providers of endometriosis services
- commissioners of endometriosis services
- women with endometriosis, their families and carers and the public.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in Welsh Government, Scottish Government, and Northern Ireland Executive.

A.4 Equality considerations

NICE has carried out an equality impact assessment during scoping. The assessment:

- lists equality issues identified, and how they have been addressed
- explains why any groups are excluded from the scope.

A.5 What the guideline is about

A.5.1 Who is the focus?

A.5.1.1 Groups that will be covered

- women with confirmed or suspected endometriosis
- women with recurrent symptoms of endometriosis
- women with asymptomatic endometriosis discovered incidentally.

Young women (aged 17 and under) have been identified as a subgroup needing specific consideration.

A.5.1.2 Groups that will not be covered

- women with endometriosis occurring outside the pelvis
- postmenopausal women.

A.5.2 Settings

A.5.2.1 Settings that will be covered

- all settings in which NHS-commissioned healthcare is provided.

A.5.3 Activities, services or aspects of care

A.5.3.1 Key areas that will be covered

- symptoms and signs of endometriosis
- how and when to monitor and refer for complications and disease progression
- use of diagnostic tests including imaging, biomarkers and surgical diagnosis
- use of staging systems to guide treatment decisions
- timing of interventions
- pharmacological and surgical treatments including analgesics, hormonal medical treatments, neuro-modulators, ablation, excision and hysterectomy with or without oophorectomy
- combining pharmacological and surgical treatments. Note that guideline recommendations will normally fall within licensed indications; exceptionally, and only if clearly supported by evidence, use outside a licensed indication may be recommended. The guideline will assume that prescribers will use a medicine's summary of product characteristics to inform decisions made with individual patients.
- non-medical management specific to pain (for example acupuncture)
- use of specialist services to deliver care
- information and support for women with endometriosis.

A.5.3.2 Areas that will not be covered

- investigation of fertility problems related to endometriosis
- care during pregnancy for women with endometriosis
- management of menopausal symptoms related to surgical treatment of endometriosis
- treatment specific to adenomyosis in isolation.

A.5.4 Economic aspects

We will take economic aspects into account when making recommendations. We will develop an economic plan that states for each review question (or key area in the scope) whether economic considerations are relevant, and if so whether this is an area that should be prioritised for economic modelling and analysis. We will review the economic evidence and carry out economic analyses, using an NHS perspective, as appropriate.

A.5.5 Key issues and questions

While writing this scope, we have identified the following key issues, and key questions related to them:

1. Clinical manifestations of endometriosis
 - What are the symptoms and signs of endometriosis?
2. Monitoring and referral
 - How and when should women with endometriosis be monitored and referred for disease progression and complications, including:
 - pain
 - bowel involvement
 - bladder and ureter involvement
 - cancer
3. Using diagnostic tests
 - What is the accuracy of the following tests in diagnosing endometriosis:
 - imaging
 - biomarkers
 - surgical diagnosis
 - endometrial biopsy?
 - Should a surgical diagnosis include histological confirmation?
4. Using staging systems to guide treatment decisions
 - What is the effectiveness of staging systems in guiding the treatment of endometriosis?
5. Timing of interventions
 - Does early laparoscopy and treatment improve outcomes?
6. Pharmacological and surgical treatments
 - What is the effectiveness of the following treatments for endometriosis, including recurrent and asymptomatic endometriosis:
 - analgesics
 - neuro-modulators
 - hormonal medical treatments
 - ablation
 - excision
 - hysterectomy with or without oophorectomy?
7. Combinations of treatments
 - What is the effectiveness of pharmacological therapy before or after surgery compared with surgery alone?
8. Non-medical management specific to pain
 - What is the effectiveness of non-medical therapies (for example acupuncture) for managing pain associated with endometriosis?
9. Using specialist services to deliver care

- What is the clinical and cost effectiveness of specialist endometriosis services?
10. Information and support
- What information and support do women with endometriosis and their families and carers need?

The key questions may be used to develop more detailed review questions, which guide the systematic review of the literature.

A.5.6 Main outcomes

The main outcomes that will be considered when searching for and assessing the evidence are:

1. pain
2. health-related quality of life
3. activities of daily living
4. complications of treatment
5. recurrence of endometriosis
6. admission to hospital
7. fertility.

A.6 Links with other NICE guidance and NICE Pathways

A.6.1 NICE guidance

A.6.1.1 NICE guidance that will be updated by this guideline

- [Fertility](#) (2013) NICE guideline CG156. Recommendations 1.7.1.1–1.7.2.4.

A.6.1.2 NICE guidance about the experience of people using NHS services

NICE has produced the following guidance on the experience of people using the NHS. This guideline will not include additional recommendations on these topics unless there are specific issues related to endometriosis:

- Menopause (2015) NICE guideline NG23
- Patient experience in adult NHS services (2012) NICE guideline CG138
- Medicines adherence (2009) NICE guideline CG76.

A.6.2 NICE Pathways

When this guideline is published, the recommendations will be added to NICE Pathways. NICE Pathways bring together all related NICE guidance and associated products on a topic in an interactive topic-based flow chart.

Other relevant NICE guidance will also be added to the NICE Pathway, including:

- Laparoscopic helium plasma coagulation for the treatment of endometriosis (2006) NICE interventional procedure guidance 171
- Long-acting reversible contraception (update) (2014) NICE guideline CG30
- Depression in adults with a chronic physical health problem (2009) NICE guideline CG91
- Heavy menstrual bleeding (2007) NICE guideline CG44

- Laparoscopic techniques for hysterectomy (2007) NICE interventional procedure guidance 239
- Laparoscopic uterine nerve ablation (LUNA) for chronic pelvic pain (2007) NICE interventional procedure guidance 234.

A.7 Context

A.7.1 Key facts and figures

Endometriosis is one of the most common gynaecological diseases needing treatment, although its exact cause is unknown. It is defined as the extrauterine growth of endometrial tissue. The main cause is thought to be metaplasia of the coelomic cells or the implantation of endometrial fragments that reach the pelvic cavity by retrograde menstruation.

Endometriosis is mainly a disease of the reproductive years, but has also been described in postmenopausal women. Delaying childbearing, either by choice or because of subfertility, may be a risk factor for endometriosis. The risk of developing the disease corresponds with the cumulative menstruation (menstrual frequency and volume over time). Women with shorter menstrual cycles (less than 27 days) and longer duration of flow (more than 7 days) are twice as likely to develop endometriosis as those with longer cycles.

The prevalence of endometriosis in the population is uncertain. Information to date is based on prevalence studies of women presenting with one of several symptoms needing laparoscopy, for example pelvic pain, dysmenorrhoea and subfertility. A diagnosis is made by observing lesions, either by laparoscopy or laparotomy, and until a simple screening test is developed, the true prevalence will remain unknown.

There is limited published literature describing the natural history of endometriosis. This is because, before the introduction of laparoscopy, only symptomatic disease was treated and the symptoms were used to define disease progression and the effectiveness of treatment. Using laparoscopy, it is possible to visualise and record the effects of treatment on the disease.

Delayed diagnosis is a significant problem for women with endometriosis. Patient self-help groups emphasise how frequently healthcare professionals delay making a diagnosis, often because they do not consider endometriosis as a possibility. Studies suggest that there may be a delay of 4–10 years between first presentation and diagnosis. Many women think that the delay in diagnosis leads to increased personal suffering, prolonged ill health and a disease state that is more difficult to treat. Many women with endometriosis also believe that delays in diagnosis occur because healthcare professionals fail to recognise the significance of symptoms and think that women are 'over-reacting'.

Endometriosis is associated with lower quality of life. A study reported that the diagnosis of endometriosis was associated with more sick days, tiredness, frequent pain, a higher daily pain level, and feeling depressed. Endometriosis is also an important cause of subfertility and this can also have a significant effect on quality of life.

A.7.2 Current practice

Women with endometriosis typically present to GPs with pain, and may then be referred to secondary care for diagnosis and management. Some women may present to fertility services.

Diagnosis is mainly by laparoscopic visualisation of the pelvis, but other less invasive methods may be used, including ultrasound and MRI scanning. Investigations are chosen on the basis of the woman's symptoms.

Management options for endometriosis include pharmacological, surgical and non-medical treatments. Endometriosis is an oestrogen-dependent disease. Most drug treatments for endometriosis work by suppressing menstruation and are contraceptive. Surgical treatment aims to ablate or excise deposits of endometrial tissue. The choice of treatment depends on the woman's priorities in terms of management of pain and/or fertility.

Complex surgical treatment is carried out in specialist endometriosis centres, which incorporate a multidisciplinary team including colorectal surgeons, urologists, pain management specialists and endometriosis specialist nurses. There are a limited number of specialist centres in the UK and as a result there is variation in the level of care that women experience in different geographical areas.

Endometriosis is a chronic condition affecting women throughout their reproductive lives. Women's priorities and preferences may change over time and management strategies should change to reflect this. Regular follow-up and monitoring is needed to ensure optimal care but this does not always happen outside specialist endometriosis centres.

Earlier diagnosis and cost-effective treatment of endometriosis may improve quality of life and productivity in the workplace, reduce healthcare cost, and consequently reduce total cost to patients and society.

A.7.3 Policy, legislation, regulation and commissioning

A.7.3.1 Legislation, regulation and guidance

The European Society of Human Reproduction and Embryology (ESHRE) has produced guidance on the management of women with endometriosis, endorsed in the UK by the Royal College of Obstetricians and Gynaecologists. The NICE guideline will consider similar areas to the ESHRE guideline but in the context of NHS-commissioned healthcare, and will include consideration of cost as well as clinical effectiveness.

A.7.3.2 Commissioning

Services for endometriosis are commissioned by CCGs on behalf of their local population through gynaecological referral pathways. NHS England has published a service specification for providing services for severe endometriosis: complex gynaecological services – severe endometriosis (Gateway reference 01369). This endorses the British Society for Gynaecological Endoscopy accreditation criteria for endometriosis centres.

A.8 Further information

This is the final scope, incorporating comments from registered stakeholders during consultation.

The guideline is expected to be published in September 2017.

You can follow progress of the guideline.

Our website has information about how NICE guidelines are developed.

Appendix C: Declarations of interest

All Committee members' interests were recorded on declaration forms provided by NICE. The form covered personal, non-personal, specific or non-specific and non-financial or financial declarations. Committee members' declarations of interests are listed in this section. No conflicts were identified that required a Committee member to be asked not to participate in the relevant discussions. Details are available from the Committee minutes available on the NICE website where the policy can also be accessed (see <https://www.nice.org.uk/about/who-we-are/policies-and-procedures>).

This appendix includes all interests declared between the start of development and submission on 19 January 2017.

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
Moji Balogun	Consultant Radiologist	Co-author for various publications relating to imaging and assessment of pelvic pain and endometriosis. 10.12.15	Personal, non-financial, non-specific	Declare and participate
Moji Balogun	Consultant Radiologist	Principal Investigator (Birmingham women's Hospital) for MEDAL (MRI [Magnetic resonance imaging] to Establish Diagnosis Against Laparoscopy) study (MRI versus laparoscopy in the assessment of patients with Chronic pelvic pain). 10.12.15	Personal, non-financial, non-specific	Declare and participate
Moji Balogun	Consultant Radiologist	Consultant Radiologist, BWNFT (Birmingham Women's Hospital Foundation Trust) Endometriosis Centre. 10.12.15	Personal, non-financial, non-specific	Declare and participate
Moji Balogun	Consultant Radiologist	Invited lecturer at national and international meetings on various aspects of female pelvic imaging. 10.12.16	Personal, non-financial, non-specific	Declare and participate
Christian Becker	Associate Professor of Gynaecology and Reproductive Medicine	Consultancy for: ObsEva TEVA Pharmaceuticals Roche Diagnostics 14.04.16	Personal, financial, non-specific	Declare and participate

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
Christian Becker	Associate Professor of Gynaecology and Reproductive Medicine	Research grants from: Bayer Healthcare Volition Roche Diagnostics 14.04.16	Non-personal, financial, non-specific	Declare and participate
Rachel Brown	General Practitioner	NICE fellow 22.05.15	Personal, non-financial, non-specific	Declare and participate
Rachel Brown	General Practitioner	GP (general practice) expert on Indicators Advisory Committee 22.05.15	Personal, non-financial, non-specific	Declare and participate
Rachel Brown	General Practitioner	Article in the British Medical Journal on pelvic pain 16.11.15	Personal, non-financial, specific	Declare and participate
Rachel Brown	General Practitioner	Appointed to the Heavy Menstrual Bleeding Update Guideline Committee. 1.12.16	Personal, non-financial, specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Director of Truro Gynaecologists Ltd and Optimum Healthcare Ltd. 29.1.16	Personal, financial, non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	17th May 2016 Appointed President of the British Society for Gynaecological Endoscopy (BSGE). 31.5.16	Personal, non-financial, specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Member of the BSGE Council and Trustee of the charity 29.1.16	Personal non-financial specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Vice President of the BSGE 29.1.16	Personal non-financial specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Fellow of the Royal College of Obstetricians and Gynaecologists (RCOG) 29.1.16	Personal, non-financial, non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Member of British Society of Urogynaecology 29.1.16	Personal, non-financial, non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Vice Chair of NHS England Complex Gynaecology Clinical Reference Group	Personal, non-financial, non-specific	Declare and participate

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
		29.1.16		
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Member of the British Medical Association (BMA) 29.1.16	Personal, non-financial, non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	The Royal Cornwall Hospital, is a reference Centre for Stryker integrated theatres and as such Dominic is committed to engage in any planned visits from other surgeons funded by Stryker, including any appropriate hospitality. 29.1.16	Non-personal financial non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Attended an educational visit to Strasbourg; IRCAD (Research Institute against Digestive Cancer) and live operating funded by Storz 29.1.16	Non-personal non-financial non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Visit to the University of Leiden to establish a joint BSGE / Leiden surgical training course. Travel costs will be covered by Ethicon	Non-personal financial non-specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Lecture as invited speaker at the European Society of Gynaecological Endoscopy 29.1.16	Personal, non-financial, specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Lecture as invited speaker at the BSGE 29.1.16	Personal, non-financial, specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Lecture as invited speaker at the RCOG World Congress 29.1.16	Personal, non-financial, specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Invite to attend final meeting of James Lind Alliance priority setting for endometriosis taking place in April 2017 03.02.2017	Personal, non-financial, specific	Declare and participate
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Member of organising committee for Edinburgh bid to host World Congress in Endometriosis 2023	Personal, non-financial, specific	Declare and participate

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
		03.02.2017		
Dominic Byrne (job share with Alfred Cutner)	Consultant Gynaecologist	Lead faculty for June 2017 BSGE/Olympus laparoscopic training programme for Gynaecology Trainees, run by the BSGE and Olympus 03.02.2017	Personal, non-financial, specific	Declare and participate
Natasha Curran	Consultant in Anaesthesia and Pain Management	Poster abstract on subject of efficacy of pain management programmes for patients with endometriosis submitted to British Pain Society Annual Scientific Meeting (May 2017). Not known if accepted at present date. 13.12.17	Personal non-financial, specific	Declare and participate
Natasha Curran	Consultant in Anaesthesia and Pain Management	Invited to write article on pain management for Endometriosis UK. Not accepted invitation yet. 19.01.17	Personal non-financial, specific	Declare and participate
Natasha Curran	Consultant in Anaesthesia and Pain Management	Invited to participate and accepted: James Lind Alliance Priority Setting Partnership for Endometriosis Final Workshop April 2017. 19.01.17	Personal non-financial, specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Lecture fees and support to attend meetings received from Astellas 11.8.15	Personal, financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Payment from Olympus to teach surgery and honorariums to present at meetings 11.8.15	Personal, financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Payment to teach surgery from Johnson and Johnson 11.8.15	Personal, financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Hospitality at meetings to discuss theatre implementation project at UCH (University College London Hospitals) from Stryker 11.8.15	Personal, financial, non-specific	Declare and participate

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Member of The BSGE 11.8.15	Personal, non-financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Member of The British Society of Paediatric and Adolescent Gynaecology 11.8.15	Personal, non-financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Member of the European Society for Gynaecological Endoscopy 11.8.15	Personal, non-financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Member of the Scientific group for the endometriosis project of the BSGE 11.8.15	Personal, non-financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Member of the UCH Endometriosis centre 11.8.15	Personal, non-financial, specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Member of the Gynaecology.co endometriosis centre 11.8.15	Personal, non-financial, specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Private practice in endometriosis 11.8.15	Personal, financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Lecture to health care providers (mainly nurses and para-medical) at King Edward 7th Hospital on Laparoscopy in fertility 14.4.16	Personal, non-financial, specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Lecture at BSGE (May 2016): Alec Turnbull invited lecture. Title will be creating change. Free travel, registration, accommodation and life membership of the society for giving this invited lecture. 14.4.16	Personal, non-financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Lecture BSGE on meeting the experts session on in bag morcellation (May 2016). 14.4.16	Personal, non-financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Paper accepted for publication related to	Personal, non-financial, specific	Declare and participate

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
		integrated theatres (gynaecological surgery) Pateman K, Holland TK, Knez J, Derdelis G, Cutner A, Saridogan E, Jurkovic D. Should a detailed ultrasound examination of the complete urinary tract be routinely performed in women with suspected pelvic endometriosis? Hum Reprod. 2015 Dec;30(12):2802-7. 14.4.16		
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Support from Stryker to create marketing video on morcellation. Financial reward from Fannin 14.4.16	Personal, financial, non-specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Continued teaching for Olympus on laparoscopic surgery including endometriosis. 14.4.16	Personal, financial, specific	Declare and participate
Alfred Cutner (job share with Dominic Byrne)	Consultant Gynaecologist	Advisory board in for Coloplast on laparoscopic prolapse surgery 14.4.16	Personal, non-financial, specific	Declare and participate
Cathy Dean	Endometriosis Clinical Nurse Specialist	Organised Endometriosis Nurse training day in conjunction with the BSGE ASM and sponsored by industry (mainly surgical instrument companies) 29.1.16	Personal, non-financial, specific	Declare and participate
Cathy Dean	Endometriosis Clinical Nurse Specialist	Change of employment to HCA healthcare UK at the Portland Hospital, commencing 17 October 2016 27.9.16	Personal, financial, non-specific	Declare and participate
Lynda Harrison	Lay member	Member of Endometriosis UK 20.01.2016	Personal, non-financial, specific	Declare and participate
Lynda Harrison	Lay member	Member of the Northern Ireland Endometriosis Support Group	Personal, non-financial, specific	Declare and participate

Name	Job title	Declarations of Interest, date declared	Type of interest	Decision taken
Lynda Harrison	Lay member	Met with Health Officials, MLA's and Health Commissioners in Northern Ireland regarding provision of endometriosis services 20.01.2016	Personal, non-financial, specific	Declare and participate
