

Economic plan

This plan identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Pancreatic cancer: diagnosis and management (Pancreatic Cancer)

2 List of modelling questions

Review questions by scope area	5d)What is the most effective treatment for people with unresectable locally advanced non-metastatic pancreatic cancer?
Population	Patients with unresectable non-metastatic locally advanced pancreatic cancer.
Interventions and comparators considered for inclusion	<i>Interventions:</i> FOLFIRINOX Chemoradiotherapy (Gemcitabine) Chemoradiotherapy (Gemcitabine) + Cisplatin Chemoradiotherapy(5-fu) Chemoradiotherapy(5-fu) + Cisplatin FLEC Gemcitabine + Erlotinib <i>Comparator:</i> Gemcitabine
Perspective	UK NHS + PSS
Outcomes	Cost per QALY
Type of analysis	CUA
Issues to note	Based on accompanying Network Meta-Analysis
Review questions by scope area	5h) What is the optimal treatment of biliary obstruction?
Population	Patients with unresectable pancreatic cancer and biliary obstruction
Interventions and comparators considered for inclusion	<i>Interventions:</i> Initial stenting with plastic stents replaced with self expanding metal stent (SEMS) on dysfunction Initial stenting with SEMS replaced with SEMS on dysfunction <i>Comparator:</i> Initial stenting with plastic stents replaced with plastic stents on dysfunction
Perspective	UK NHS + PSS
Outcomes	Cost per QALY
