

Pancreatic cancer in adults: diagnosis and management

Appendix D

Combined Search Strategy

February 2018

Final

*Developed by the National Guideline Alliance,
hosted by the Royal College of Obstetricians
and Gynaecologists*

Disclaimer

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or service users. The recommendations in this guideline are not mandatory and the guideline does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or their carer or guardian.

Local commissioners and/or providers have a responsibility to enable the guideline to be applied when individual health professionals and their patients or service users wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with compliance with those duties.

NICE guidelines cover health and care in England. Decisions on how they apply in other UK countries are made by ministers in the Welsh Government, Scottish Government, and Northern Ireland Executive. All NICE guidance is subject to regular review and may be updated or withdrawn.

1 Appendix D: Combined Search Strategy

D.1.2 Diagnosis and staging

D.1.13 People with jaundice

4 What is the most effective diagnostic pathway (imaging +/-CA 19–9, biopsy (cytology or
5 histology)) for adults with suspected pancreatic cancer in secondary care who have
6 jaundice?

7 See section D.1.5.1, D.1.5.2 & D.1.5.3.

D.1.28 People without jaundice but with a pancreatic abnormality

9 What is the most effective diagnostic pathway (imaging +/-CA 19–9, biopsy (cytology or
10 histology)) for adults with suspected pancreatic cancer in secondary care who do not have
11 jaundice but have a pancreatic abnormality on imaging?

12 See section D.1.5.1, D.1.5.2 & D.1.5.3.

D.1.33 Pancreatic Cysts

14 In adults with a pancreatic cyst, what is the diagnostic pathway to identify the cyst(s) at high
15 risk of pancreatic malignancy?

16 See section D.1.5.1, D.1.5.2 & D.1.5.3.

D.1.47 People with inherited high risk of pancreatic cancer

18 What is the most effective monitoring protocol for adults with an inherited high risk of
19 pancreatic cancer in secondary care to ensure early diagnosis?

D.8.1 Management of resectable and unresectable pancreatic cancer [searches by intervention]

D.8.1.13 Neo-adjuvant treatment

- 4 Is neoadjuvant therapy for adults with resectable and borderline resectable pancreatic
5 adenocarcinoma an effective treatment?

D.8.1.26 Resectable and borderline resectable pancreatic cancer

- 7 What is the most effective surgery (type and extent) for adults with newly diagnosed
8 resectable and borderline resectable pancreatic cancer?

D.8.1.39 Adjuvant treatment

- 10 What is the most effective adjuvant therapy (chemotherapy, chemoradiotherapy, biological
11 therapy, immunotherapy, combinations of therapies) for adults who have undergone surgical
12 resection of pancreatic adenocarcinoma?

D.8.1.43 Management of locally advanced pancreatic cancer

- 14 What is the most effective treatment (chemotherapy, chemoradiotherapy, radiotherapy,
15 combinations of chemotherapy and chemoradiotherapy, biological therapies or other local

- 1 therapies) for adults with newly diagnosed or recurrent unresectable locally advanced non-
- 2 metastatic pancreatic cancer?

D.8.1.53 Management of metastatic pancreatic cancer

- 4 What are the most effective interventions (excluding relevant NICE TAs) for adults with newly
- 5 diagnosed or recurrent metastatic pancreatic cancer (chemotherapy, surgery, radiotherapy)?

D.8.26 Database: Medline [Surgery]
