

# Economic plan

This plan identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

## 1 Guideline

Attention deficit hyperactivity disorder: diagnosis and management

## 2 List of modelling questions

|  |  |
|--|--|
| <b>Review question(s) by scope area</b>                | <b>Combination treatments:</b><br><b>What is the clinical and cost-effectiveness of combined non-pharmacological and pharmacological interventions for people with ADHD?</b>   |
| Population   | Children with ADHD.  |
| Interventions and comparators considered for inclusion | Intervention A: Combination therapy (a pharmacological plus non-pharmacological intervention)<br>Intervention B: compared to each other<br>Intervention C: individual therapies<br>Intervention D: 'standard therapy' which is probably medication.<br><br>Comparators dependent on clinical evidence.<br><br>No treatment may also be included. |
| Perspective  | NHS and PSS perspective.   |
| Outcomes   | QALYs, costs   |
| Type of analysis                                       | CUA  |
| Issues to note   | Dependent on feasibility of an NMA. Time horizon will be short given lack of long term data.   |
| <b>Review question(s) by scope area</b>                | <b>Non-pharmacological treatments:</b><br><b>What is the most clinically and cost-effective non-pharmacological treatment, and combination of treatments, for people with ADHD?</b>  |
| Population   | Children with ADHD   |
| Interventions and comparators considered for inclusion | Intervention A: non-pharmacological intervention<br>Intervention B: compared to each other<br>Intervention C: no treatment, or 'usual care' which might be medication<br><br>Comparators dependent on clinical evidence.   |
| Perspective  | NHS and PSS perspective.   |
