

Appendix A

How this guideline was developed

This guideline was developed in accordance with the process and methods set out in [Developing NICE guidelines: the manual](#).

Search strategies

The evidence reviews used to develop the guideline recommendations were underpinned by systematic literature searches, following the methods described in [Developing NICE guidelines: the manual](#). The aim of the systematic searches was to comprehensively identify the published evidence to answer the review questions developed by the Guideline Development Group and NICE Collaborating Centre for Social Care.

A search strategy for the review questions was developed by the NICE Collaborating Centre for Social Care. The research questions were translated into a framework of five concepts of: a) population (people with a learning disability and behaviour that challenges), and b) service provision (including models of services and service capacity) or c) risk management or safeguarding or d) integrated services or e) access to services. These concepts reflected the question areas of types of service provision, service capacity, service delivery and integration of services.

These concepts were translated into search strategies using subject heading and free text terms, either in the title and abstract fields or all fields depending on the database searched. The strategies were run across twelve databases. A date limit was not set but where possible, the results were limited to English language. Additional searches of websites of relevant organisations were undertaken to capture literature that might not have been found from the database searches.

Economic evidence was searched for as part of the search strategy, and included the economic database NHS Economic Evaluation Database (NHS EED) and the Cochrane Database of Systematic Reviews which includes economic evaluations.

Guideline Development Group members were also asked to alert the NICE Collaborating Centre for Social Care to any additional evidence, published, unpublished or in press, that met the inclusion criteria.

The searches were undertaken between December 2015 and January 2016.

An additional search on assistive technology was undertaken between August and September 2016. The Guideline Committee highlighted that assistive technology was of particular interest in helping to support people to live independently and the original search did not include evidence on assistive technology for people with learning disabilities and behaviour that challenges. Therefore, an additional search was completed on assistive technology but was not limited to people with learning disabilities and behaviour that challenges.

Forward citation searches of included studies were conducted using Google Scholar in order to identify additional relevant studies.

Update searching of the bibliographic database searches, including the additional search on assistive technology was undertaken between February and March 2017. A date limit of 2015 to 2017 was applied to the database searches.

Scoping searches

Scoping searches were undertaken between February and April 2015 using the following websites and databases. The search results were used to provide information for scope development and project planning.

Databases	Organisational websites	NICE guidelines (existing)
Centre for Reviews and Dissemination (CRD) Databases; DARE, HTA, NHS EED	Care Quality Commission (CQC)	NICE Guideline CG72 NICE Guideline CG77 NICE Guideline CG78 NICE Guideline CG123

Main searches

The following database, academic or organisational sources were searched for all of the questions.

Databases:

- Applied Social Sciences Index and Abstracts (ASSIA)
- Cochrane Database of Systematic Reviews, Trials and Economic Reviews
- Cumulative Index to Nursing and Allied Health Literature (CINAHL)
- Educational Information Resources Center (ERIC)
- Family and Society Studies Worldwide
- Health Management Information Consortium (HMIC)
- Medical Literature Analysis and Retrieval System Online (MEDLINE)
- NHS Economic Evaluation Database (NHS EED) (Economic Evaluations)
- PsycINFO
- Social Care Online (for update search)
- Social Policy and Practice

- Social Services Abstracts
- SocINDEX

Websites:

- Department for Education (DfE)
- Department of Health (DH)
- Health and Social Care Information Centre (HSCIC)
- Ministry of Justice (MOJ)
- Centre for Disability Studies
- Centre for Intellectual and Developmental Disabilities (CIDD)
- The Challenging Behaviour Foundation
- Foundation for People with Learning Disabilities
- The Improving Health and Lives Learning Disabilities Observatory (IHaL)
- The Institute of Public Care (IPC)
- National Development Team for Inclusion (NDTi)
- NHS England
- Norah Fry Research Centre
- Prison Reform Trust (suggested by a Guideline Committee member at GC3)
- Royal College of Psychiatrists
- The Tizard Centre

Systematic reviews searches

The search strategies for the databases are listed below.

Applied Social Sciences Index and Abstracts (ASSIA) - ProQuest

Social Care Online (SCO) – Social Care Institute for Excellence

Date searched: 15/02/2017

Number of records: (713)

Limits: date (2015-2017)

Note: Due to technical difficulties, any saved searches would not run when combined. Therefore, a series of smaller searches were undertaken, exported to Endnote (reference management software) and deduped within the library. The results were then exported to Eppi Reviewer.

Economic search

The searches to identify economic evaluations related to the review questions were the same as the main evidence search.

Review questions and review protocols

- What is the effectiveness of different types of community based services (including residential) for children, young people and adults with learning disabilities and behaviour that challenges?
- What is the effectiveness of different types of inpatient services (in and out of area) for children, young people and adults with learning disabilities and behaviour that challenges?
- What is the cost-effectiveness of different types of services for children, young people and adults with learning disabilities and behaviour that challenges?
- What are the views and experiences of children, young people and adults with learning disabilities and behaviour that challenges, their families and carers of different types of community and inpatient services?
- What is the appropriate community-based (including residential care) service capacity for children, young people and adults with learning disabilities and behaviour that challenges, and their families and carers?
- What is the appropriate inpatient bed capacity (local and out of area) for children, young people and adults with learning disabilities and behaviour that challenges, and their families and carers?

- What models of service delivery are effective for children, young people and adults with learning disabilities and behaviour that challenges, and their families and carers?
- What models of service delivery are cost-effective for children, young people and adults with learning disabilities and behaviour that challenges, and their families and carers?
- What are the views and experiences of children, young people and adults with learning disabilities and behaviour that challenges, their families and carers of different models of services delivery?
- What models of service delivery facilitate timely access to effective and cost-effective services for children, young people and adults with learning disabilities and behaviour that challenges?
- What mechanisms enable effective joined-up working between education, health and social care service providers supporting children, young people and adults with learning disabilities and behaviour that challenges, and their families and carers?
- What mechanisms enable effective joined-up working between health and, social care providers of services and with children, young people and adults with behaviour that challenges, and their families and carers?
- What mechanisms enable effective shared decision-making, empowerment and coproduction of services between education, health and social care service providers of services and children, young people and adults with learning disabilities and behaviour that challenges, their families and carers?
- What is the effectiveness of different types of assistive technology to support independent living for adults with learning disabilities?
- What is the cost-effectiveness of different types of assistive technology to support independent living for adults with learning disabilities?
- What are the views and experiences of adults with learning disabilities who use different types of assistive technology to support independent living?

1. Types of services

Component	Description
<p>Review No & Questions</p> <p>3.1</p> <p>Scope section:</p> <p>1.5.1.1. Key areas and issues</p> <p>3. Location of services</p> <p>4. Types of service</p>	<p>1.1. What is the effectiveness of different types of community based services (including residential) for children, young people and adults with learning disabilities and behaviour that challenges?</p>
<p>Objectives</p>	<p>To assess what works and how for different types of services.</p> <p>To assess the relative impacts of different combinations of services to inform the models of service delivery question.</p> <p>To assess the barriers and facilitators to positive outcomes</p> <p>To assess the strength of evidence of the effectiveness of different types of services based on the amount and quality of the evaluation studies</p>
<p>Criteria for considering studies for the review</p>	<p>Population</p> <p>People with a learning disability and behaviour that challenges.</p> <p>Parents, families or carers of people with a learning disability and behaviour that challenges.</p> <p>Professionals who work with People with a learning disability and behaviour that challenges.</p> <p>Intervention</p> <p>Community based services, inpatient services,</p> <p>Setting</p> <p>All settings where care is delivered.</p> <p>Person-focused outcomes</p> <p>Child development outcomes; continuity of care; families and carers stress and resilience; frequency, severity and duration of behaviour that challenges; health and social care related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction.</p> <p>Service-focused outcomes</p> <p>Availability, access and uptake of local services; equity of access; meeting complex, physical and mental health needs; geographical variation in service provision (locally, regionally and nationally); level and type of support from care workers and carers; positive behaviour support; timely discharge; out of area placements; use of inpatient.</p> <p>Phenomena of interest (for views and experiences studies)</p>

	Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence
Evidence type	Systematic reviews, randomised controlled trials, non-randomised controlled trials, cross-sectional surveys, retrospective case note reviews. Views and experiences studies.
Changes made in the course of the review	
Review No & Question 3.1 Scope section: 1.5.1.1. Key areas and issues 3. Location of services 4. Types of service	1.2. What is the effectiveness of different types of inpatient services (in and out of area) for children, young people and adults with learning disabilities and behaviour that challenges?
Objectives	To assess what works and how for different types of services. To assess the relative impacts of different combinations of services to inform the models of service delivery question. To assess the barriers and facilitators to positive outcomes To assess the strength of evidence of the effectiveness of different types of services based on the amount and quality of the evaluation studies
Criteria for considering studies for the review	Population People with a learning disability and behaviour that challenges. Parents, families or carers of people with a learning disability and behaviour that challenges. Professionals who work with People with a learning disability and behaviour that challenges. Intervention Community based services, inpatient services, Setting All settings where care is delivered. Person-focused outcomes Child development outcomes; continuity of care; families and carers stress and resilience; frequency, severity and duration of behaviour that challenges; health and social care related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction. Service-focused outcomes Availability, access and uptake of local services; equity of access; meeting complex, physical and mental health

	<p>needs; geographical variation in service provision (locally, regionally and nationally); level and type of support from care workers and carers; positive behaviour support; timely discharge; out of area placements; use of inpatient.</p> <p>Phenomena of interest (for views and experiences studies)</p> <p>Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence</p>
Evidence type	Systematic reviews, randomised controlled trials, non-randomised controlled trials, cross-sectional surveys, retrospective case note reviews. Views and experiences studies.

4. Timely access to services

Component	Description
Review No & Question 3.4 Scope section: 1.5.3.2. Key areas and issues 1 Models of service delivery 2. Service capacity 5 Timely access to services 6 Timely access to staff 9 Safeguarding 10 Risk management	Q.4. What models of service delivery facilitate timely access to effective and cost-effective services for children, young people and adults with learning disabilities and behaviour that challenges?
Objectives	To identify the factors that help or hinder the timely access to services To assess the effectiveness of interventions and services that aim to facilitate timely access to services To look at the ways in which effective services achieve timely access to services To assess the barriers and facilitators to achieving timely access
Criteria for considering studies for the review	Population People with a learning disability and behaviour that challenges, parents, families or carers of people with a learning disability and behaviour that challenges. Professionals who work with people with a learning disability and behaviour that challenges. Intervention Community-based services, inpatient services, models of service delivery. Setting All settings where care is delivered. Person-focused outcomes Child development outcomes; continuity of care; families and carers stress and resilience; frequency, severity and duration of behaviour that challenges; health and social care-related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction.

	<p>Service-focused outcomes</p> <p>Availability, access and uptake of local services; equity of access; timely discharge; out-of-area placements; use of inpatient services.</p> <p>Phenomena of interest (for views and experiences studies)</p> <p>Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence.</p>
Evidence type	Systematic reviews of effectiveness studies; systematic review of views and experiences; randomised controlled trials (RCTs); non-randomised controlled trials; studies of cost-effectiveness; qualitative studies of people's views and experiences.
Changes made in the course of the review	

5. Joined up working

Component	Description
<p>Review No & Question</p> <p>3.5</p> <p>Scope section:</p> <p>1.5.4.1. Key areas and issues</p> <p>7 Integration of health and social care services</p> <p>8 Joint working</p> <p>9 Safeguarding</p> <p>10 Risk management</p>	<p>5.1. What mechanisms enable effective joined-up working between education, health and social care service providers supporting children, young people and adults with learning disabilities and behaviour that challenges, and their families and carers?</p>
Objectives	<p>To assess what components of joint working are associated with effective joint working between service providers</p> <p>To assess what contextual factors are associated with effective joint working between service providers</p>
Criteria for considering studies for the review	<p>Population</p> <p>People with a learning disability and behaviour that challenges, parents, families or carers of people with a learning disability and behaviour that challenges. Professionals who work with people with a learning disability and behaviour that challenges.</p> <p>Intervention</p> <p>Community-based services, inpatient services. interventions to improve joint working.</p> <p>Setting</p> <p>All settings where care is delivered.</p> <p>Person-focused outcomes</p>

	<p>Child development outcomes; continuity of care; families and carers stress and resilience; frequency, severity and duration of behaviour that challenges; health and social care related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction.</p> <p>Service-focused outcomes</p> <p>Availability, access and uptake of local services; equity of access; meeting complex, physical and mental health needs; geographical variation in service provision (locally, regionally and nationally); level and type of support from care workers and carers; positive behaviour support; timely discharge; out of area placements; use of inpatient services.</p> <p>Phenomena of interest (for views and experiences studies)</p> <p>Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence.</p>
Evidence type	<p>Single-case evaluations, process evaluations, mixed methods studies, views and experiences studies.</p> <p>For this review, we were only interested in those elements of the study that talk about mechanisms to help services be integrated.</p>
Changes made in the course of the review

Changes made in the course of the review	

6. Assistive technology to support independent living (additional review question)

Component	Description
<p>Review No & Questions</p> <p>3.6</p> <p>Scope section:</p> <p>1.5.1.1. Key areas and issues</p>	<p>6.1 What is the effectiveness of different types of assistive technology to support independent living for adults with learning disabilities?</p>

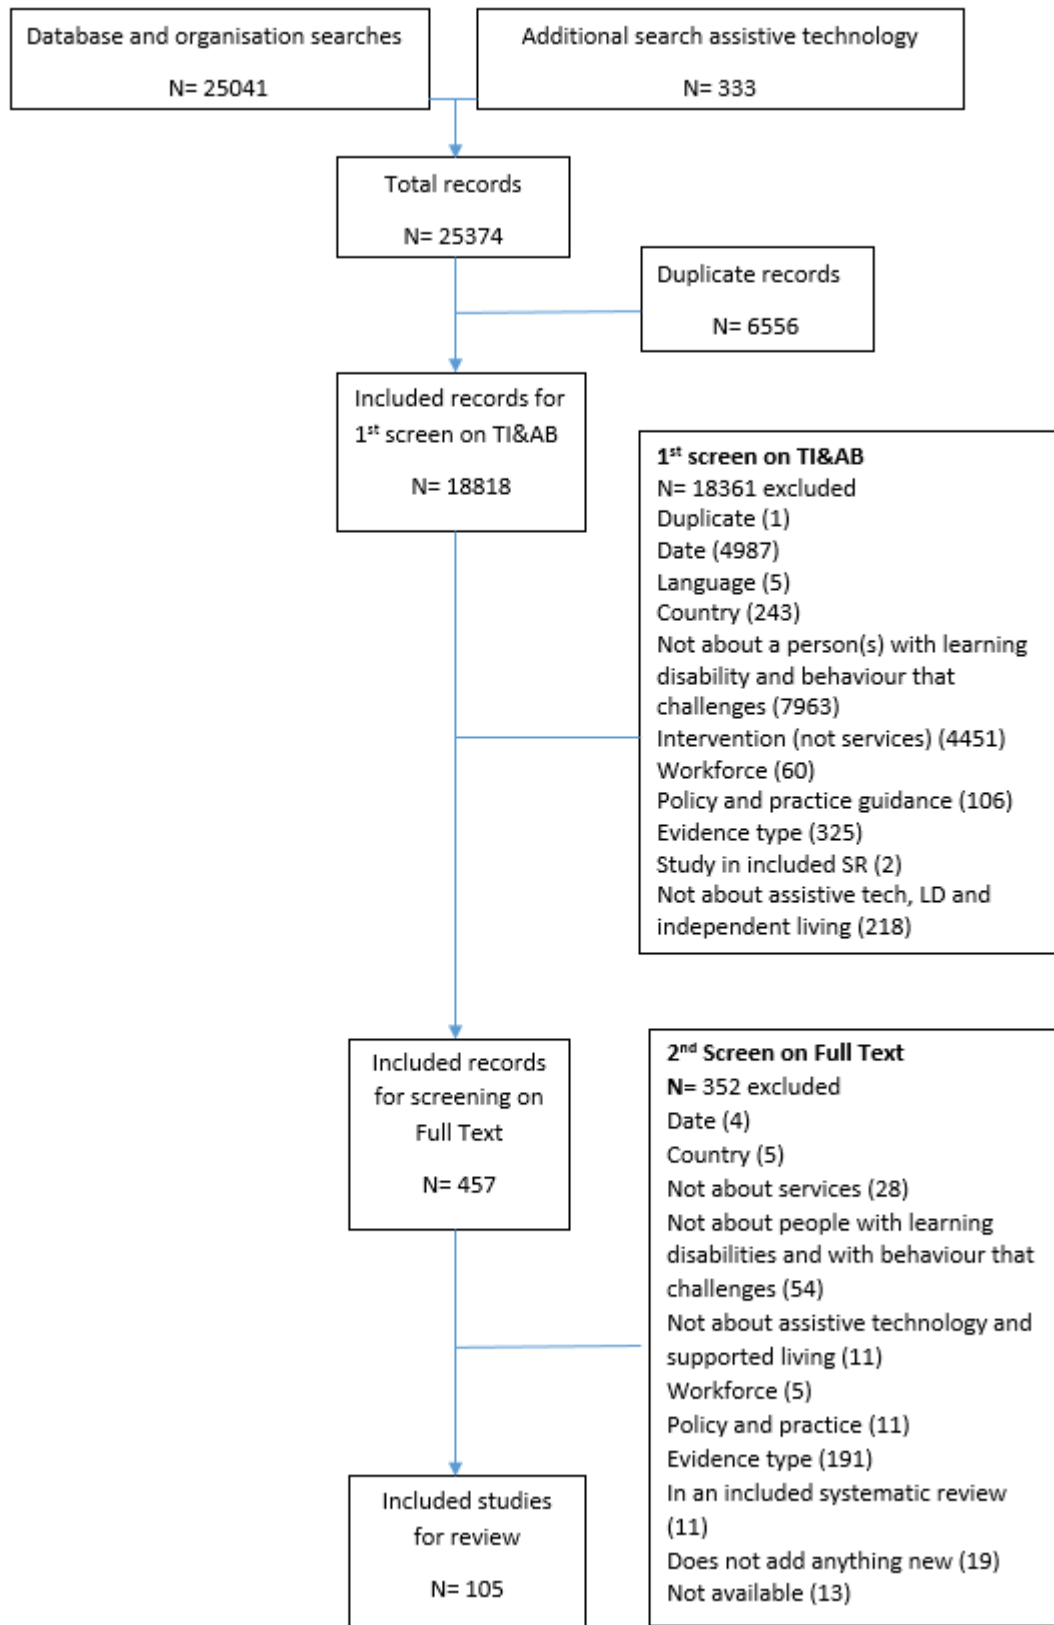

<p>3. Location of services 4. Types of service</p>	
<p>Objectives</p>	<p>The Guideline Committee wanted to know if assistive technology helps people with learning disabilities and behaviour that challenges live in their own home independently.</p>
<p>Criteria for considering studies for the review</p>	<p>Population Adults with a learning disability, their parents, families or carers of people with a learning disability. Professionals who work with adults with a learning disability.</p> <p>Intervention Assistive technology to support independent living, including home adaptations, bed sensors, alarms, remote monitoring, apps.</p> <p>Setting People's homes where people live independently or with support.</p> <p>Person-focused outcomes Health and social care related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction.</p> <p>System-focused outcomes Availability, access and uptake of local services; equity of access; meeting complex, physical and mental health needs; geographical variation in service provision (locally, regionally and nationally); level and type of support from care workers and carers.</p> <p>Phenomena of interest (for views and experiences studies) Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence.</p>
<p>Evidence type</p>	<p>Systematic reviews, randomised controlled trials, non-randomised controlled trials, cross-sectional surveys, retrospective case note reviews. Views and experiences studies.</p>
<p>Changes made in the course of the review</p>	<p>This question was added during the review because the Guideline Committee wanted to know if assistive technology helps people with learning disabilities and behaviour that challenges live in their own home independently. We did not find any studies that answered this question directly for this population in our data set, but the Committee agreed that studies about assistive technology that support independent living for all people with learning disabilities would be able to help answer that question. We conducted an additional search about assistive technology for people with learning disabilities.</p>

<p>Review No & Questions 3.6 Scope section: 1.5.1.1. Key areas and issues 1.4. Economic aspects 3. Location of services 4. Types of service</p>	<p>6.2. What is the cost-effectiveness of different types of assistive technology to support independent living for adults with learning disabilities?</p>
<p>Objectives</p>	<p>The Guideline Committee wanted to know if assistive technology helps people with learning disabilities and behaviour that challenges live in their own home independently.</p>
<p>Criteria for considering studies for the review</p>	<p>Population Adults with a learning disability, their parents, families or carers of people with a learning disability. Professionals who work with adults with a learning disability.</p> <p>Intervention Assistive technology to support independent living, including home adaptations, bed sensors, alarms, remote monitoring, apps.</p> <p>Setting People's homes where people live independently or with support.</p> <p>Person-focused outcomes Health and social care related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction.</p> <p>System-focused outcomes Availability, access and uptake of local services; equity of access; meeting complex, physical and mental health needs; geographical variation in service provision (locally, regionally and nationally); level and type of support from care workers and carers.</p> <p>Phenomena of interest (for views and experiences studies) Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence.</p>
<p>Evidence type</p>	<p>Systematic reviews, randomised controlled trials, non-randomised controlled trials, cross-sectional surveys, retrospective case note reviews. Views and experiences studies.</p>
<p>Changes made in the course of the review</p>	<p>This question was added during the review because the Guideline Committee wanted to know if assistive technology helps people with learning disabilities and behaviour that challenges live in their own home</p>

	independently. We did not find any studies that answered this question directly for this population in our data set, but the Committee agreed that studies about assistive technology that support independent living for all people with learning disabilities would be able to help answer that question. We conducted an additional search about assistive technology for people with learning disabilities.
Review No & Question 3.6 Scope section: 1.5.1.1. Key areas and issues 4. Types of service 3. Location of services	6.3. What are the views and experiences of adults with learning disabilities who use different types of assistive technology to support independent living?
Objectives	The Guideline Committee wanted to know if assistive technology helps people with learning disabilities and behaviour that challenges live in their own home independently.
Criteria for considering studies for the review	<p>Population Adults with a learning disability, their parents, families or carers of people with a learning disability. Professionals who work with adults with a learning disability.</p> <p>Intervention Assistive technology to support independent living, including home adaptations, bed sensors, alarms, remote monitoring, apps.</p> <p>Setting People's homes where people live independently or with support.</p> <p>Person-focused outcomes Health and social care related quality of life; inclusion in community life; service user involvement in planning, delivery and monitoring of services; service user, family and carer satisfaction.</p> <p>System-focused outcomes Availability, access and uptake of local services; equity of access; meeting complex, physical and mental health needs; geographical variation in service provision (locally, regionally and nationally); level and type of support from care workers and carers.</p> <p>Phenomena of interest (for views and experiences studies) Barriers and facilitators to access to services; experiences of stress and resilience; preferences and values; involvement in the planning, delivery and monitoring of services; inclusion in community life; independence.</p>

Evidence type	Systematic reviews of views and experiences, views and experiences studies.
Changes made in the course of the review	This question was added during the review because the Guideline Committee wanted to know if assistive technology helps people with learning disabilities and behaviour that challenges live in their own home independently. We did not find any studies that answered this question directly for this population in our data set, but the Committee agreed that studies about assistive technology that support independent living for all people with learning disabilities would be able to help answer that question. We conducted an additional search about assistive technology for people with learning disabilities.
