NICE Technology Appraisal Guidance No. 145; Cetuximab for the treatment of locally advanced squamous cell cancer of the head and neck

As the appraisal has been on the static list for more than 5 years, NICE has been gathering intelligence to ascertain whether there is any new evidence available relevant to this appraisal and whether this should be considered through the full review proposal process.

We have concluded that there has been no change in the evidence base that is likely to lead to a change in the existing recommendations.

As a result, we have decided that TA145 should remain on the static list and no further action is required at this time.
