

Dear Kate

Thanks for extending the deadline on this. Our response to the questions posed by NICE are as follows

Has all of the relevant evidence been taken into account?

Yes

Are the summaries of clinical and cost effectiveness reasonable interpretations of the evidence?

Yes

Are the provisional recommendations sound and a suitable basis for guidance to the NHS?

Yes. From a PCT perspective, we believe that using available resources for smoking cessation, lung cancer awareness, early diagnosis and supportive care will be more effective in reducing the impact of lung cancer.

Are there any aspects of the recommendations that need particular consideration to ensure we avoid unlawful discrimination against any group of people on the grounds of gender, race, disability, age, sexual orientation, religion or belief?

We are not aware of any.

Many thanks
