## **Decision to incorporate into an on-going update of a clinical guideline and transfer to the static list**

The Institute was proposing that TA267 should be incorporated into the on-going update of NICE's clinical guideline on chronic heart failure in adults (CG108) and transferred to the static list.

After consideration of all of the comments received during the Review Consultation, the Technology Appraisals programme has decided to proceed with this proposal.

Consequently, the guidance will be incorporated into an on-going clinical guideline update and will be transferred to the static guidance list. Topics on the static list can be considered for review if any new evidence becomes available that is likely to lead to a change in the existing recommendations.
