Decision to move the existing guidance to the static list

We would like to update you on the decision made regarding the review of the existing guidance on TA373; Abatacept, adalimumab, etanercept and tocilizumab for treating juvenile idiopathic arthritis.

There has been no change to the marketing authorisations relating to juvenile idiopathic arthritis for the 4 treatments. There is no new evidence that is likely to lead to a change in the current recommendations.

NICE's Guidance Executive has decided to proceed with this proposal without consultation.

Consequently, TA373 will move to the 'static list' of technology appraisals.
