## Decision to move the existing guidance to the static list

We would like to update you on the decision made regarding the review of the existing guidance on TNF-alpha inhibitors for ankylosing spondylitis and non-radiographic axial spondyloarthritis (TA383).

There is no new evidence to suggest the recommendations should change. The guidance has already been incorporated into the NICE guideline on [spondyloarthritis in over 16s](#), published in February 2017.

NICE's Guidance Executive has decided to proceed with this proposal without consultation.

Consequently, TA383 will move to the 'static list' of technology appraisals.
