

Naldemedine for treating opioid-induced constipation

Information for the public

Published: 30 September 2020

www.nice.org.uk

Naldemedine (Rizmoic) is available on the NHS as a possible treatment for constipation caused by opioid medicines in adults after laxative treatment.

Is this treatment right for me?

Your healthcare professionals should give you clear information, talk with you about your options and listen carefully to your views and concerns. Your family can be involved too, if you wish. Read more about [making decisions about your care](#).

Questions to think about

- How well does it work compared with other treatments?
- What are the risks or side effects? How likely are they?
- How will the treatment affect my day-to-day life?
- What happens if the treatment does not work?
- What happens if I do not want to have treatment? Are there other treatments available?
