Re : Review of NICE Technology Appraisal Guidance No 69, the use of liquid-based cytology for cervical screening

Proposal to move guidance to the static list

Thank you for including the BSCCP. **XXXX** has asked me to write to you with comments about the planned review of the above guidelines this month. The BSCCP would support the original assessment and agrees that there is not any relevant additions to the evidence base that would have a material effect on the guidance advised. Liquid based cytology has widespread support and has fulfilled its promise as a more effective and user-friendly system when compared to traditional cytology.

In short we support the proposal to move the guidance to the static list.

Yours sincerely
