

# Budesonide orodispersible tablet for inducing remission of eosinophilic oesophagitis

Information for the public

Published: 23 June 2021

[www.nice.org.uk](http://www.nice.org.uk)

Budesonide orodispersible tablet (Jorveza) is available on the NHS as an option to reduce the symptoms of eosinophilic esophagitis in adults, for up to 12 weeks only.

## Is this treatment right for me?

Your healthcare professionals should give you clear information, talk with you about your options and listen carefully to your views and concerns. Your family can be involved too, if you wish. Read more about [making decisions about your care](#).

## Questions to think about

- How well does it work compared with other treatments?
- What are the risks or side effects? How likely are they?
- How will the treatment affect my day-to-day life?
- What happens if the treatment does not work?
- What happens if I do not want to have treatment? Are there other treatments available?

## Information and support

The [EOS Network \(eosinophilic diseases charity\)](#) can give you advice and support on 0333 772 1309 or at [contactus@eosnetwork.org](mailto:contactus@eosnetwork.org).

You can also get support from your local [Healthwatch](#).
