

Nivolumab with ipilimumab and chemotherapy for untreated metastatic non-small-cell lung cancer

Information for the public

Published: 8 September 2021

www.nice.org.uk

Nivolumab (Opdivo) plus ipilimumab (Yervoy) and 2 cycles of platinum-doublet chemotherapy is not normally available on the NHS for untreated metastatic non-small-cell lung cancer in adults. Your doctor should talk with you about other treatment options. If you are already having it, you should be able to continue until you and your doctor decide when best to stop.

The [NHS website](#) may be a good place to find out more.

These organisations can give you advice and support:

- [Roy Castle Lung Cancer Foundation](#), 0333 323 7200
- [Lung Cancer Nursing UK](#), 01675 477607
