

Thank you for inviting the RCPCH to submit evidence on the proposal to move the above guidance to the static list.

The College believes that this topic has been well-researched and there is no new evidence that would have a material effect on the guidance at this time. Therefore, we think that is reasonable to move the guidance onto the static list until new evidence becomes available. This is with the understanding that NICE do conduct regular literature searches for new evidence on the subject, and are willing to accept new evidence from external individuals at any time.

Many thanks
