

Atezolizumab for adjuvant treatment of resected non-small-cell lung cancer

Information for the public

Published: 28 September 2022

www.nice.org.uk

Atezolizumab (Tecentriq) is available through the [Cancer Drugs Fund](#) as a possible adjuvant treatment after complete tumour resection in adults with stage 2 to 3a non-small-cell lung cancer (NSCLC) whose:

- tumours have the programmed cell death ligand-1 (PD-L1) biomarker expression on 50% or more of their tumour cells and
- whose disease has not progressed after platinum-based adjuvant chemotherapy.

More evidence on atezolizumab is being collected. After this NICE will decide whether or not to recommend it for use on the NHS and update the guidance. It will be available through the Cancer Drugs Fund until then.

If you are not eligible for atezolizumab but are already having it, you should be able to continue until you and your doctor decide when best to stop.

Is this treatment right for me?

Your healthcare professionals should give you clear information, talk with you about your options and listen carefully to your views and concerns. Your family can be involved too, if you wish. Read more about [making decisions about your care](#).

Questions to think about

- How well does it work compared with other treatments?
- What are the risks or side effects? How likely are they?
- How will the treatment affect my day-to-day life?
- What happens if the treatment does not work?
- What happens if I do not want to have treatment? Are there other treatments available?

Information and support

The [NHS website](#) may be a good place to find out more.

These organisations can give you advice and support:

- [Roy Castle Lung Cancer Foundation](#), 0333 323 7200
- [Lung Cancer Nursing UK \(LCNUK\)](#), 01675 477 607
- [Cancer Research UK](#), 0808 800 4040
- [Macmillan Cancer Support](#), 0808 808 0000

You can also get support from your local [Healthwatch](#).
