

# Mosunetuzumab for treating relapsed or refractory follicular lymphoma

Information for the public

Mosunetuzumab (Lunsumio) is not normally available on the NHS for treating relapsed or refractory follicular lymphoma in adults who have had 2 or more systemic therapies (treatments that target the whole body). Your doctor should talk with you about other treatment options. If you are already having it, you should be able to continue until you and your doctor decide when best to stop.
