Equality impact assessment – Scoping

Pembrolizumab with trastuzumab and chemotherapy for untreated locally advanced unresectable or metastatic HER2-positive gastric or gastro-oesophageal junction adenocarcinoma [ID3742]

The impact on equality has been assessed during this evaluation according to the principles of the NICE Equality scheme.

1. Have any potential equality issues been identified during the scoping process (draft scope consultation and scoping workshop discussion), and, if so, what are they?
None identified
2. What is the preliminary view as to what extent these potential equality issues need addressing by the Committee?
N/a
3. Has any change to the draft scope been agreed to highlight potential equality issues?
N/a
4. Have any additional stakeholders related to potential equality issues been identified during the scoping process, and, if so, have changes to the stakeholder list been made?
None identified
