

NATIONAL INSTITUTE FOR HEALTH AND CARE EXCELLENCE

Indicator Equality Impact Assessment

Topic: Acute myocardial infarction

1.1 Have any potential equality issues been identified during the development process?

No issues have been identified.

1.2 Have any population groups, treatments or settings been excluded from coverage by the indicator? Are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?

Any exclusions from coverage of the indicators are justified, for example due to contraindication to interventions or medications used in these indicators.

1.3 Does the indicator make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

These indicators do not make it more difficult for specific groups to access services.

1.4 Is there potential for the indicator to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

There is no potential for the indicators to have an adverse effect on people with disabilities because of a consequence of the disability.
